

# Creed's Farm

bury lane | epping

Bermac Properties Plc acquired this site in 2002 with planning permission to transform a derelict farm shop and former restaurant premises into five 2 and 3 bedroom character homes.

As the development was in a Conservation in the Metropolitan Green Belt and within the setting of a listed building, Bermac retained the external traditional style of the properties whilst creating modern, stylish interiors with an enviably high specification.

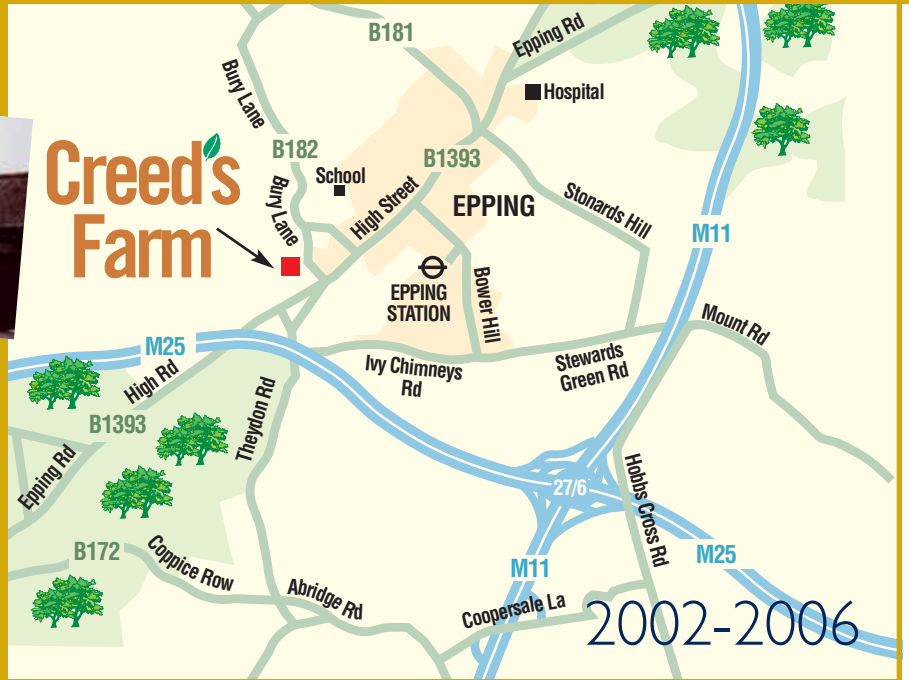

The development included the construction of a new oak cart lodge with solar-powered lighting and the formation of a new paddock for use as shared amenity land.

The development was completed in 2004.
